

GOODS

Cold chain monitoring, recording, reporting

Continuous temperature monitoring | Alerts on temperature thresholds

Opening of package monitoring

Light sensor

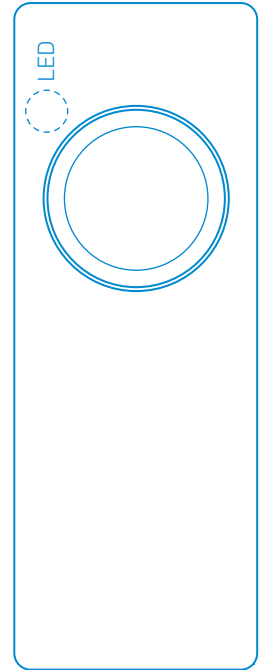

Tilt monitoring (yoghurts etc.)

Continuous tilt monitoring via accelerometer

Goods impact or freefall

Continuous monitoring via accelerometer

ASSETS

Machinery, forklifts impact monitoring

Continuous monitoring via accelerometer

Machinery usage / engine hours monitoring

Continuous monitoring and recording of vibrations and sending for up to one Second resolution of machine usage

Ordering button, panic button

Button with or without LED and beep

Theft prevention

Assets tracking with location

Opening of doors etc.

Door mode using magnetometer and accelerometer or reed sensor

LOCATION

Location tracking using just Sigfox

Several modes available reporting either when object moving or when object is still one kilometer precision

Location based on customer WiFi network/beacons

Several modes available reporting either when object moving or when object is still tens of meters precision

Location based on public WiFi network

Several modes available reporting either when object moving or when object is still hundred of meters precision
